WHAT IS AN IPMS?

Integrated, Cloud-Based Project Management and Collaboration System for Modern Infrastructure Projects

EVERYTHING CONNECTED - INFORMATION, PROCESS, PEOPLE!

Wrench SmartProject IPMS helps you monitor project health parameters for your entire portfolio of projects by issuing automated notifications in case of variance. The notifications are based on accurate status data, and facilitates proactive corrective measures to prevent undesirable outcomes like project delays & budget overrun, while consistently achieving high quality and ensuring adherence to the prescribed standards of health and safety.

Managers can aggressively monitor every aspect of every project in the company's portfolio by using Wrench SmartProject IPMS.

CASE STUDY 1

Partnering with Wrench, a leading Chemical and Fertilizer company launched a digital transformation journey that provided a single version of the truth. Harnessing the power of Wrench SmartProject IPMS, the client had access to real-time project information and automated notifications, which strengthened its decision-making capabilities.

The company also got dashboards, including procurement, safety, quality, and risk for statutory compliance.

"A really robust and user-friendly system developed from actual client requirements. I have evaluated and worked with many systems over the last 25 years and I think this one is remarkably well suited for an engineering company"

Stephen Petch

Project Controls Manager, Tetrattech.

The entire project quality management processes across engineering, procurement, and construction are built into the Wrench SmartProject IPMS system ensuring that stakeholders adhere to the processes.

Wrench can set up the program as well as project portfolio dashboard reporting process and formats including 4D visualization for effective decision making. Wrench IPMS provides a real-time dashboard featuring major and critical issues and along with analysis of data, suggested corrective actions, active and emerging risks and mitigation plans.

CASE STUDY 2

One of the leading oilfield service providers headquartered in UK and has a subsidiary in Abu Dhabi, partnered with Wrench to implement the Wrench SmartProject to manage its engineering, procurement, and construction projects. Client, consultant, contractor, and over 120 vendors, worked in the single unified platform, Wrench SmartProject. Additionally, integrated their internal procurement system with SmartProject.

OUR MARQUEE CLIENTS

BUSINESS BENEFITS

- 30% less deliverable management time
- 85% improvement in project management efficiency
- 100% visibility on cashflows and receivables
